The retail tariffs in Kenya were last revised in January 2022 to take into account the effects of the Energy Act, 2019. The current Energy Act mandates KPLC to review tariffs on a quarterly basis. The existing retail tariffs were approved on application by KPLC on 7th October 2019. The revised retail tariffs were effective up to 30th June 2020.

The review of the retail tariffs by KPLC is in line with the requirements of the Energy Act, 2019, which mandates the regulator to review tariffs quarterly. The review of the tariffs is aimed at ensuring that the tariffs are reflective of the costs incurred by KPLC and are also competitive in the market.

The retail tariffs are divided into three categories: Bulk, TOU, and Comm./industrial. The bulk tariff is charged to large industrial consumers, while the TOU tariff is charged to small industrial and commercial consumers. The Comm./industrial tariff is charged to residential and small commercial consumers.

The review of the retail tariffs is carried out to ensure that they are reflective of the costs incurred by KPLC and are also competitive in the market. The review also ensures that the tariffs are in line with the requirements of the Energy Act, 2019.

The new tariffs were effective from 1st July 2020 and were reviewed again in January 2021.
